How to make an iMovie Trailer for Students

Intermediate Student Friendly Version

1. Open the iMovie app.
2. Tap the + sign in the top right corner to create a new iMovie Trailer.
3. Tap the “Trailer” option.
4. Look through the different trailer “styles.” After looking through the different style options, choose your favorite style that will best fit with your plan.
5. Tap the “create” button in the top right corner once your style is selected.
6. Tap on the text lines and fill out the Name, Studio, and Credits information.

The information that you fill out will show up at the end of your trailer in the credits.
7. Once you're done with the credits, click on the Storyboard tab.
8. You can now edit the clips and titles (the text shown in between the video clips).
9. Click on the text highlighted in blue to change the text shown in between the video clips.
10. Tap a thumbnail to choose your videos or photos.

The thumbnail will show and tell you how many people would be ideal for each segment (and even tell you their name if you've entered them in the cast information above!), as well what type of shot to pick (e.g. action).
11. Tip: iMovie defaults to showing you all the videos on your iPhone, iPod touch, or iPad because that's what you're making, a video! You can choose to tab over to Photos if you want to include some stills, or even Camera if you want to grab an extra shot.
12. Tap on a video you want to add
13. Slide the yellow braces left or right to choose the part of the video you want to add
14. Tap Play to preview the video
15. Tap Insert to add the video to your trailer.
16. Repeat until you've filled in all the thumbnails
17. Tap Undo to go back to where you were right before
18. Tap on a video or photo thumbnail you want to change and make your changes.
To watch your trailer:

1. Tap the play button to watch it small, within the work area.
2. Tap the play full screen button to watch it big.
When you're all done:

1. Tap on the arrow facing left to return to projects.
How to share your video:

1. Tap on the Share button.
2. Choose the service you want to share with.
3. Tip: An easy way to turn this into your teacher would be to save the video to your iPad and/or air drop it to her.
4. Tapping the “save video” button will put a copy of your video into your Photos app.
